MARKET AGAINST THE BULLS' CONTROL.

Stocks Close with General Advances, Although a Natural Reaction at the Close Carried Prices Down from the Top.

NATURAL APPRECIATION IN STOCKS.

No doubt much of the recent rise in securities is based upon the coming dividend and interest disbursements in July, which will exceed any previous month in the history of Wall Street. Insiders who hold the stocks do not propose to sell to investors at low prices if better quotations can be established prior to these disbursements. The general sentiment in the market is decidedly more bullish, with the large interests for the first time showing their hands.

Wall Street, June 8.

The recovery in stock prices which began yesterday, with the declaration of the regular dividend on Sugar and the unexpected increase in the 4% coupon dividend was continued in today's market. The weaker shorts were inclined to cover their contracts, but it was evident that some of the larger bear operators were so completely wedded to that side of the market that they made no effort to turn to the other side. Commission house buying was of larger proportions, showing an increase in the interest of the public in speculation. The larger interests were for the first time open buyers of their specialties. London sold upward of \$5,000,000, not on account of international securities, but on account of a bullish attitude on American stocks, but rather for the purpose of taking advantage of the present prices here, which are higher than the figures at which these shares were purchased. It was not until the London offerings had been absorbed and arbitrage business over that the market really began to get under full headway.

Sugar, Metropolitan and Brooklyn Rapid Transit were the three particularly strong features in the first turn of the market upward. It is evident that the insiders in Sugar accomplished their object in forcing out outside holdings by the threat of a reduction in the dividend. With the insiders again in control of most of the floating supply of the stock, it was comparatively easy matter to force the price higher. With the Pullman Stock, which was accumulated steadily by strong interests identified with the management of the company, causing an advance of 4% to 5% in the morning, selling off to 2 1/2. Brooklyn Rapid Transit had a similar movement, Flower & Co. being credited with purchases of upward of \$100,000 shares, which were some short covering in this stock on the appearance of these orders, which carried it up 3% to 1 1/2%. Subsequently, the market was early efforts to hold down the market were made in repeated drives at the granger stocks, but finding that these movements were abortive, the market began to rise in these securities, with Rock Island in particular, leading the way to a higher level of prices.

Toward the close there was a perfectly natural reaction from the top prices, which, anything, demonstrated that the substantial basis for the rise and making a far better market than it had been for a steady and violent advance closing at the top. In this reaction practically all of the active shares sold off from their best prices, with Sugar, Metropolitan and Brooklyn Rapid Transit again declining. The reaction in the list were very general, although in the majority of cases only fractional, with the following showing the most marked declines: American Car & Foundry preferred, American Steel Hoop preferred, American Tin Plate preferred, American Tobacco, Canadian Pacific, Canadian National, Rock Island, Omaha, Continental Tobacco, Hocking Valley preferred, Iowa Central preferred, Minneapolis, St. Paul & Northern Pacific, Pressed Steel Car, Panhandle, Texas & Pacific, Standard Distilling preferred, New York Airbrake & International Paper.
